3. Use the *Manufacturer's Codes* to locate the type of device and brand name and then enter the first four-digit code for your component. If performed correctly, the LED will blink twice.

4. Aim the remote control at the device and press POWER once. The device should turn off. If it does not respond, repeat steps 2-3, trying each code for your brand until you find one that works. If it still does not work, try *Searching For Your Code*.

CHECKING THE CODES

If you have set up the remote control using the *Searching For Your Code* procedure, you may need to find out which four-digit code is operating your equipment:

For example, to find out which code is operating your TV:

1. On the remote control, press TV once.
2. Press and hold SETUP until the LED blinks twice, then release SETUP.
3. Enter 9 - 9 - 0. The LED will blink twice.

   NOTE: If a code digit is "0", the LED will not blink.

5. Repeat step 4 three more times for remaining digits. Use 2 for the second digit, 3 for the third digit, and 4 for the fourth digit.
6. To check for codes of other devices, repeat steps 1 through 5, but substitute the appropriate device key for each device you are checking. As before, write down each four-digit code.

RE-ASSIGNING DEVICE KEYS
