2. Press **9 - 9 - 5**. The *Cinema 5*'s red light will blink twice.

3. Press and release the **MACRO** key. This will be the key that will play back the series of keystrokes assigned to that key.

4. Begin entering the sequence of keystrokes, up to 15, that you wish to be played back when you press the MACRO key. To play back the macro you need to press the MACRO key. For example:
   RCVR + **POWER** + **TV** + **POWER** + **TV/VCR** (To change the input on the TV to VIDEO 1) + **CBL/SAT** + **POWER**.

5. Once your sequence is entered, press and hold **SETUP** until the *Cinema 5*'s red light blinks twice.

The Big Easy HT Plus does not operate your home entertainment components or is not performing commands properly?	Try all of the codes listed for your brand of home entertainment component in the "Setup Codes" section. Many setup codes may allow for partial functionality, however, only one setup code will operate your home entertainment component correctly. Make sure that all of the components you are setting up can be operated with an infrared remote control.
Problems programming a TV/VCR combo?	Try the VCR set-up codes for your brand. However, some combo units may require both a TV code for volume control and a VCR code for the remaining functions.
VCR not recording?	As a safety feature on the *Cinema 5*, you must press the REC key twice.
CH ▲/▼ and **PREV CH** not working for your RCA TV?	Due to RCA design (1983-1987), only the original remote control will operate these functions.
Problems changing channels?	If your original remote control required an Enter keystroke when changing channels, press the ENTER key on the *Cinema 5* after you enter the channel number.
The red light blinks when you press a key but you receive no response from your home entertainment component?	Make sure you are aiming your *Cinema 5* at your home entertainment component and that you are within 15 feet before using your remote.
